

**Saturday, January 29**  
**8am-1pm**  
**CNM Main Campus**

**Girls grades 5-9** are invited to attend hands-on workshops and learn about different careers from women professionals. This is a wonderful opportunity for girls who are interested in science, technology, engineering and math (STEM) to learn about various career opportunities, meet local role models and have fun with other young women who like science and math.

We need **YOUR** help in making sure your students are aware of this event. Attached is a flyer. We'd be happy to mail you additional copies – see below. Please consider including information in your school newsletter, offering extra credit for students to attend, and organizing a group of students to attend.

For more information and to register for this free event by January 14, 2011:  
[www.expandingyourhorizons.org/conferences/Albuquerque/](http://www.expandingyourhorizons.org/conferences/Albuquerque/)  
 or [nmnwse.org/ceyh](http://nmnwse.org/ceyh)

Thank you,  
 The Expanding Your Horizons Planning Committee

**Presented by the New Mexico Network  
 for Women in Science and Engineering**
