# expanding your horizons

**2010**

**Albuquerque EYH Conference**

**Saturday, April 3**

**8 am - 1 pm**

*Central New Mexico Community College*

Grades 6-12

*technical career workshops for young women*

# THE CONFERENCE

## For Students

Here is your chance to meet with woman professionals from the community who have found satisfying careers in law, mathematics, engineering, computing, medicine, and other non-traditional technical careers.

Middle and high school girls attend three workshops, each led by a woman professional who shares an aspect of her technical field through a hands-on activity. Workshops typically have 10 to 15 students, facilitating interaction between the presenter and students.

Presenters also share personal experiences, education and other influences that have impacted their decisions as they have developed their careers.

## For Adults

Here is your chance to find out more about such topics as academic college preparation, paying for college, and keeping girls interested in science and math.

These workshops are designed for parents and educators. Adult participation is optional, but adults must register to attend workshops. Adults are not permitted to attend student workshops.

# SCHEDULE
